

### About RDE Systems

RDE Systems, makers of eCOMPAS, has been serving public health for over 25 years. We are proud that RDE has grown only by referrals, and not through marketing and sales. Our business philosophy is simple, yet refreshingly uncommon in industry: "If you do good things for good people, good things happen." We are focused on the long-term interests of our clients, and our no-commission policy allows our consults to be pressure-free.

We believe in a partnering philosophy with our clients where we go above and beyond the scope of contract to ensure success beyond expectation. We choose to work only with clients who care about making a real difference, who value and appreciate innovation, and who have high standards of success.

RDE Systems' staff volunteers in hands-on community HIV programs, and our support team – and even our developers – work directly with frontline staff so that we are always in touch with what really makes a difference. Receiving such great appreciation from our clients and being part of making a real difference is more rewarding to us than traditional business metrics. Our unique philosophy, combined with our highly acclaimed eCOMPAS product and track record, make us proud to be so uncommon.

*"Thank you for your and RDE's invaluable counsel and support regarding the smooth operation of e2Hawaii over the past several years. I look forward to our continued collaboration in the future."*

*-Planner for the STD/AIDS Prevention Branch, Hawaii*

*"A really big thanks to you and your team at RDE, we would not have a system without you all and would not have had such a wonderful launch meeting and great engagement without all of the thoughtful and helpful dialogue and work you and your team have put into the system over the past couple of years. Please convey my thanks to your team and let them know that VDH and our contractors are so excited about moving forward with this system, it has really made a huge difference to have a team of developers like RDE working with us, who care about the users and the utility of the product."*

*-Director of HIV Surveillance Division of Disease Prevention, Virginia Department of Health*

*"RDE has been a creative and consistent partner on our systems development delivering on time and providing timely and ongoing feedback on the project status."*

*-- Executive Director, NYC*

*"Given that this was first year that NYC Part A Providers had to submit the RSR, our team had anxiety about the system and the 2013 RSR submission process, but when I found out that RDE Systems was involved in building the RSR module, I was no longer worried. The RSR reporting module RDE developed was user-friendly, and enabled us to report complete and timely information to HRSA and to our Grantee."*

*- Medical Director, NYC hospital*

*"eCOMPAS is a really good system. I wish other data system was like eCOMPAS. It helps me get work done faster."*

*- Data coordinator, NYC hospital*

*"I am very happy to have the system. Before eCOMPAS came along I had to travel from office to office to enter data. eCOMPAS is universal and allows me to do work from one office or at home."*

*- Care Manager, Hyacinth New Brunswick*

*"Convinced work we are doing with eCOMPAS is absolutely ground breaking. No product out there is doing population management like eCOMPAS."*

*- Medical Director, NY*

*"Thank You so much RDE, RSR has come such a long way due to all your hard work and efforts am so grateful to have you working on this project."*

*- Data Coordinator, NYC*

*"We are very pleased so far with e2Boston. Case managers are really appreciative of the decrease in paperwork and the ease of accessing their client files. And I really like it for reporting purposes."*

*- Grant Manager, Boston*

# RDE Award-Winning HIT Partner

**EMR and CAREWare Interoperability**

**to save time and reduce errors**

## How to Dramatically Improve Outcomes, such as

27,000+ Users

200,000+ Clients

700+ Agencies

\$400 Million+ Funding Managed

## Thank you, HRSA SPNS!

HRSA Special Projects of National Significance (SPNS) has supported RSR capacity development through innovative grants offered around the country. The user-friendly and robust eCOMPAS RSR module built by RDE Systems was replicated in many regions throughout the country. The underlying know-how developed by RDE in partnership with SPNS recipients is embodied in systems used by over 200 sub-grantees, a HRSA SPNS replication success story.

Low-Health Literacy Patient Portal
